Version : 102

Erit

The game also requires:

.NET Framework 4.7.2

https://support.microsoft.com/en-us/topic/microsoft-net-framework-4-7-2-offline-installer-for-windows-05a72734-2127-a15d-50cf-daf56d5faec2

Note: Old game is using .net 3.5. Windows 10 systems come with .net 4.0 preinstalled. This is why you might be missing .net 4.7.2

DirectX 9.0c or newer

https://www.microsoft.com/en-us/download/details.aspx?id=8109

Note: If you already have old game running on this computer, then DirectX is most likely already installed

Microsoft Visual C++ Redistributable

https://learn.microsoft.com/en-us/cpp/windows/latest-supported-vc-redist?view=msvc-170

Scroll down until you see this section with download links:

Architecture	Link	Notes
ARM64	https://aka.ms/vs/17/release/vc_redist.arm64.exe ₽	Permalink for latest supported ARM64 version
X86	https://aka.ms/vs/17/release/vc_redist.x86.exe 🕫	Permalink for latest supported x86 version
X64	<u>https://aka.ms/vs/17/release/vc_redist.x64.exe</u> r ^a	Permalink for latest supported x64 version. The X64 Redistributable package contains both ARM64 and X64 binaries. This package makes it easy to install required Visual C++ ARM64 binaries when the X64 Redistributable is installed on an ARM64 device.

Note: If you already have old game running on this computer, then C++ Redistributable is most likely already installed

Drivers for your videocard

Note: You can find download links at your videocard manufacturer website or your laptop manufacturer videocard website

Note: If you have multiple videocards (integrated and dedicated graphics card), you may have issues running the game with one of them while the other videocard will work as expected.
